Case Study

bhpbilliton

BHP Olympic Dam Uranium, Olympic Dam, South Australia

BHP Billiton is the world's largest diversified resources company and has approximately 39,000 employees working in more than 100 operations in 25 countries. Located 560 kilometers north of Adelaide, South Australia, Olympic Dam is a multi-mineral ore body. It is the world's fourth largest remaining copper deposit, fifth largest gold deposit and the largest uranium deposit. Export regions include United Kingdom, France, Sweden, Finland, Belgium, Japan, South Korea, Taiwan, Canada and the United States.

Challenges

- Manual process with multiple external documents and spreadsheets to manage compliance and shipping processes.
- Use of shared databases with other company divisions that did not adhere to the Uranium business processes.
- Use of other divisions compliance systems for communicating with terminals/Customs etc.
- Difficult to interact and support users around the world as processes were manual and not managed from one direct source.

Solution

- Implementation of TridentGLOBAL and SAP Interface that
 - Creates/Manages documentation at all stages in the Export Process.
 - Creates/Manages Shipments including PRA's and EFI's.
 - Creates/Manages multiple Customs messages.
- Creation of uranium specific database.
- Development and integration of new documents :
 - Various dangerous goods declarations.
 - Carrier request form's.
- Ongoing support is now delivered from the global documentation centre in Singapore.
