

essDOCS Export Management (formerly TridentGLOBAL)

Industry-leading Software, Support & Experience

Since 1992, TridentGLOBAL has enabled exporters to automate, integrate and streamline their global trade and logistics management processes. As a member of the **essDOCS Group** since 2017, we are now able to deliver our solutions in a more local and personal way, supported by a network of 75 people in 10 countries spanning 4 continents – ensuring that our customers receive the right mix of software and services, wherever they are located and whatever challenges they may face.

Our goal is to improve your productivity and operational efficiency – making international trade easy!

We provide exporters and traders a comprehensive solution to the challenges they encounter in managing complex international trade processes, setting the world standard for global trade and logistics management software. **essDOCS Export Management** can be delivered as a standard vertical market solution based on your business requirements.

Delivering the right export solution for your business:

- Cloud-based solution that can be accessed online, anytime, anywhere
 - Long-standing relationship with ERP vendors including SAP, Oracle, JD Edwards, Pronto, Microsoft Dynamics, MYOB and QAD
 - Microsoft-registered partner, with solution development using Microsoft tools and technology
 - Accredited with Australian & US Customs and Departments of Agriculture, while our compliance module can easily be added for more countries
-

Our Services

While our technology enables you to streamline your company's global trade & logistics management practices, it's our Implementation Team who will assist you in reviewing your current export processes and help you identify better ways of doing business.

The Implementation Team reviews and examines your organisation's current operational procedures, processes, risk management protocols and internal controls to provide you with the requisite global trade management insights and recommendations necessary to achieve industry best practice.

State-of-the-Art Global Trade Management Solution

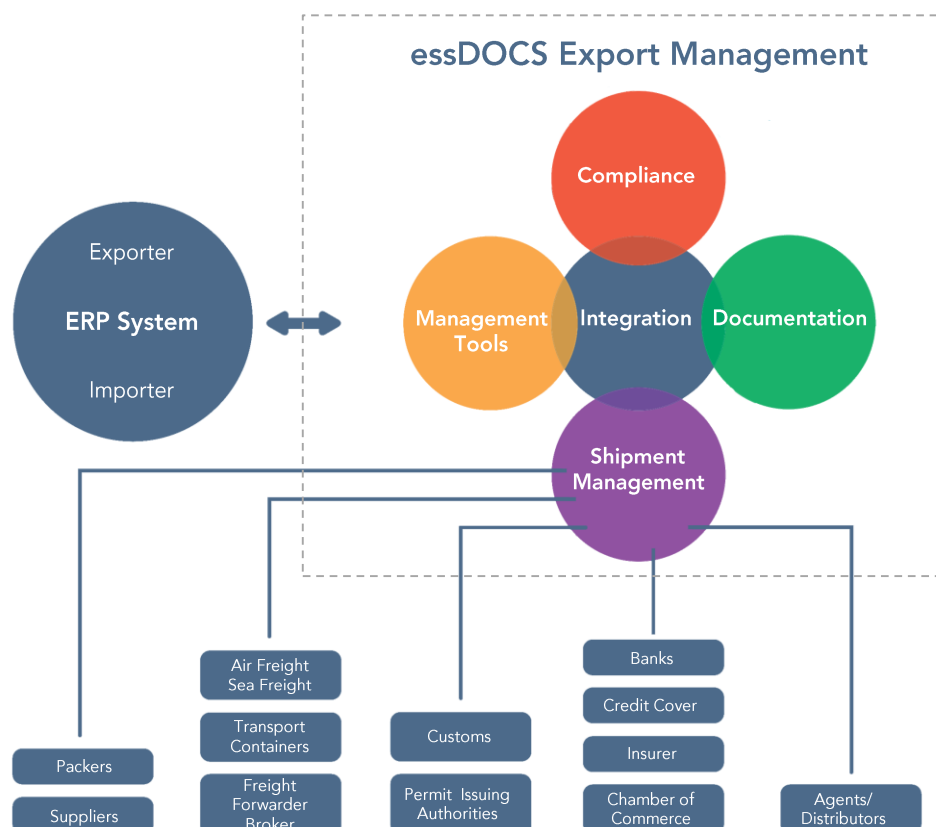

Integrated solution covering the five key functional aspects of exporting:

- **Integration**
- **Shipment Management**
- **Documentation**
- **Compliance**
- **Management Tools**

Enabling exporters to: improve operational efficiencies, make faster and more profitable decisions, master compliance requirements, minimize costs and risks, and support an increasing scale of operations.

Our intelligent and agile global trade and logistics management software spans every process in export operations, from order to payment, while allowing exporters to manage shipments in a Multi-Country, Multi-Exporter and Multi-User environment.

Our solution – a central, unified view of supply chain reality
